

Description

Rocket Nylon Engine Cleaning Tube Brush is designed for targeted cleaning in narrow engine and tube spaces. Manufactured using natural fibre fill and galvanised wire, it delivers effective cleaning performance with durability. Its silver/brown finish reflects a balanced design, supporting routine cleaning applications for maintenance professionals. Suitable for indoor and outdoor tasks, this product reliably achieves consistent results, offering a practical tool for professionals seeking precision cleaning in confined areas.

Features

- Durable cleaning brush with robust natural fibre fill
- Silver brown finish enhances workspace visual appeal
- Adaptable for indoor and outdoor cleaning applications
- Galvanised wire construction promotes durability and longevity
- Precision engineered for efficient maintenance of engine tubes
- Trusted ROCKET craftsmanship for reliable cleaning performance
- Designed for rigorous cleaning of tough deposits and grime
- Expertly crafted brush supports precision in every cleaning task
