

Description

Easyroll Pneumatic Reducer Sleeve 5/8" Bore is a polypropylene component designed to facilitate accurate wheel replacement and maintenance in professional settings. It utilises a centred wheel offset paired with pneumatic wheels made of nylon and plain bearings to ensure reliable performance. This product offers practical technical advantages that enhance the efficiency and precision of equipment used by trade professionals in their daily operations.

Features

- Constructed from robust, impact-resistant black polypropylene
- Precision engineered for smooth operation in plain bearing systems
- Pneumatic nylon wheel delivers reliable traction and rotation
- Centred wheel offset ensures balanced and stable performance
- Suitable for outdoor and indoor applications
- Reducer sleeve design improves wheel fitment and efficiency
- Low maintenance assembly supports everyday operational practicality
- Engineered for easy integration and quick replacement

Product Code: REDBUSH5/8

Specifications

Bearing Type	Plain Bearing
Wheel Offset	Centred
Outdoor Use	Yes
Indoor Use	Yes
Hardware Included	No

Appearance

Product Colour	Black
----------------	-------

Construction

Product Material 1	Polypropylene
Wheel Material	Nylon

Dimensions

Axle Bore ID (IN)	5/8
Product Height (mm)	31.5
Product Width (mm)	31.5
Product Length (mm)	2
Suits Axle Size (IN)	5/8

Weights

Product Weight (grams)	10
