

## Description

Easyroll Folding Handle Platform Trolley 250kg is a platform trolley featuring a steel frame and roller bearing system designed for the reliable movement of heavy loads. Its grey finish and folding handle configuration provide practical manoeuvrability and stability on various surfaces, making it a valuable tool for trade professionals. Suitable for both indoor and outdoor use, it offers a robust, straightforward solution for the efficient handling of equipment and materials in professional settings.

## Features

- Durable steel frame ensures reliable structural support
- Roller bearings reduce friction and enable smooth movement
- Sturdy platform supports secure transport of items
- Indoor outdoor capability enhances operational versatility
- Carries up to 250kg for efficient material handling
- Refined grey finish provides a professional appearance
- Integrated folding handle aids repositioning and storage
- Simple construction meets practical transport requirements

**Product Code: TFP250**

## Dimensions

|                     |     |
|---------------------|-----|
| Product Height (mm) | 205 |
| Product Width (mm)  | 610 |
| Product Length (mm) | 910 |

## Weights

|                     |       |
|---------------------|-------|
| Product Weight (kg) | 18.6  |
| Load Capacity (kg)  | 250.0 |

## Specifications

|                   |                |
|-------------------|----------------|
| Bearing Type      | Roller Bearing |
| Outdoor Use       | Yes            |
| Indoor Use        | Yes            |
| Hardware Included | No             |

## Appearance

|                |      |
|----------------|------|
| Product Colour | Grey |
|----------------|------|

## Construction

|                |       |
|----------------|-------|
| Frame Material | Steel |
|----------------|-------|
