

PeelGard®

PeelGard® is a high-quality coating that effectively protects windows from damage during construction. When sprayed or rolled on, this protective solution forms a skin-tight plastic film over the window and frame, creating a barrier against damaging elements.

Suitable for use for up to 12 months, PeelGard® is a practical and long-lasting preventative solution to window damage. Once construction is complete, simply peel away the coating to reveal the original surface looking and feeling like new.

For optimal results, we recommend using either a Lambs Wool Roller or Airless Spray Gun. If you need technical advice or require a sample of PeelGard®, please contact us at 0800 834 704.

Please note that PeelGard® products cannot be applied if the temperature is below freezing or during rainfall. For external applications where the window is likely to be exposed to direct rainfall, ensure the window is completely dry before applying PeelGard®. To create a fully sealed barrier against the elements, you MUST also add a layer of 1090 Top Coat. This waterproof barrier has been specifically designed to be used in conjunction with PeelGard® to ensure adequate protection from further rainfall or moisture.

Protect your windows with PeelGard® for both residential and
