

WINWARD SCONCE

DWC10
Ivory
H: 20 IN
W: 8.5 IN
D: 5 IN

Our artfully rendered Windward scone strikes a graphic note, created in an elongated profile, with a body that curls around a tubular light source. The inventive light is cast in ivory resin with a scratched finish carved into the material. A contrasting, bronzed steel, integrated LED light centers the piece, casting light above and below. Finish will vary. Certified for damp locations and intended for interior use.
