MELT CHANDELIER ARTERIO RS

Dripping gracefully from bronze-plated iron supports and black fabric cords, this fixture creates a striking sense of motion enhanced by their flexible structure. Multiple pieces can be arranged together at staggered heights for especially dramatic displays, making the design both decorative and highly functional across a range of interiors. While the cast glass elements are fixed in position and the cords are non-adjustable, the ceiling caps can be strategically placed to alter the fixture's overall width and height. Certified for damp locations and intended for interior use. Finish will vary.
