Features

RealVNC Server with RFB 3.3 Support

Up to four users can remotely and securely access computers outside your network, with the possibility of creating 16 user profiles with defined access rights.

High Performance Video over VNC

RealVNC enables video resolutions of up to 1600x1200, as it is free of the limitations of HTTPS.

USB and Virtual Media Support

Engineered to act as a conduit through which data can be passed so that files can be transferred via IP onto the ipeps and onto the target computer by means of a USB virtual media port.

Independent Operation

Maintain full control even during boot up, BIOS level or computer crash states, it will work even if the controlled devices are not operational.

Enterprise Management Software

ADDER.NET provides a centralized, secure and intuitive user access management interface, where up to 16 user profiles with defined access rights can be created.
