

WATER PROTECT

Adhesive Tape Double-Sided For Fixing And Sealing Led Profiles

PROPERTIES

Adhesive (double-sided) strip for fixing and sealing LED covers

PROCESSING

1. Cut the adhesive tape to size.
2. The substrate must be cleaned and any contaminants such as release agents, preservatives, grease, oil, dust, water, old adhesives/sealants and other substances that impair adhesion must be removed.
3. Remove the protective film from the adhesive strip and stick it in the desired position. First, apply the adhesive tape to the cover and then stick it to the profile.

The generally accepted rules of technology and tiling must be observed. Suitability for use with mechanical and chemical resistance must always be checked in each individual case.

TECHNICAL DIMENSIONS AND PRODUCT VARIANTS

Colour	transparent
Length	5,000 cm

Please note: For technical reasons, tolerances in color effects of the materials and print are possible. All information is based on the best of our knowledge and belief. No guarantee can be derived from this. We reserve the right to any technical changes if they are in the interest of progress or if they are production-related.

Height	0.19 mm
Width mm	5 mm
