

# TI-NICHE

Additional shelves and storage space in the bath and shower with shower niches

## PROPERTIES

TI-NICHE is a waterproof and tileable installation niche.

Heat resistance: EN 1684 From -25°C to +70°C

Pull-out resistance with epoxy adhesive: EN 1348 N/mm 0.6 (+/-0.15)

Pull-out resistance with cementitious adhesive (28 DAYS): EN 1348 N/mm 0.35 (+/-0.15)

## MATERIAL

Upper and lower material: PP/PE

Inner core: XPS

Colour: Yellow

## PROCESSING

1. Make sure there's enough space in the wall for the recess.  
For flush-mounted installation, take the recess frame into account.  
The depth and dimensions of the recess must be taken into account and adjusted accordingly.  
When using in a stud frame, a load-bearing structure made of beams or profiles must be created in advance to support the TI niche.
2. Depending on the installation situation, apply Flex adhesive or Classic Flex M310 sealing adhesive to the frame and rear wall.
3. Insert the niche element into the recess and align it.
4. For flush-mounted installation, apply Flex adhesive to the niche frame if necessary (using a spatula). If the frame is mounted on the wall, plaster or cover the existing wall surfaces accordingly.
5. To install a tube joint tape around the niche frame, apply Classic Flex M310 adhesive sealant to the entire surface. Apply the tube joint tape (DURABASE ET-S or WP) with at least 5 cm overlap and press down firmly.
6. Seal the remaining wall surface with a suitable sealing system if necessary. When using DURABASE ET-S or WP, no tube joint tape is required – the above step can be omitted!
7. Apply the final wall covering.

Please note: For technical reasons, tolerances in color effects of the materials and print are possible.
