

Ti-SHELF DNG

Triangular Corner Shelf With Equal-Length Legs For Retrofitting

MATERIAL

Stainless steel V2A/304 is particularly suitable for applications subject to high mechanical stress and for applications with particularly high requirements for cleanliness, hygiene and chemical resistance. Contact with products containing hydrochloric acid should be avoided. Even with stainless steel, flash rust may occur depending on the environmental conditions, which should be removed immediately.

The suitability for mechanical and chemical loads must always be checked in each individual case.

CARE

Stainless steel V2A/304 does not require any special care. If necessary, it can be cleaned simply with clear, clean water and a few drops of washing-up liquid. Then wipe dry. Acidic and abrasive cleaning agents should be avoided. Flash rust can be removed with commercially available polishes suitable for stainless steel.

PROCESSING

1. Hold TI-SHELF in the appropriate place on the wall and mark the areas to be cleaned in the joints.
2. Very carefully scrape out the marked areas of the joints to a sufficient depth using a suitable tool (knife/multi-tool).
3. Cut the tile to size on the TI-SHELF and work it in with mounting adhesive. Ensure a slight gradient.
4. Fill the scraped joints with silicon (or mounting adhesive) and place the TI-SHELF.
5. Seal the wall connection and the joint at the front edge with silicon.

Protect visible surfaces from contact with tile adhesive or grout and clean immediately with a cloth and clear water if necessary. Then rub dry.

The generally accepted rules of technology and tiling must be observed. Suitability for use with mechanical and chemical resistance must always be checked in each individual case.

Please note: For technical reasons, tolerances in color effects of the materials and print are possible. All information is based on the best of our knowledge and belief. No guarantee can be derived from this. We reserve the right to any technical changes if they are in the interest of progress or if they are production-related.

TECHNICAL DIMENSIONS AND PRODUCT VARIANTS

Material	[Stainless Steel (304)]
Surface	[brushed]
Colour	natural
Height	12.5 mm
dimension	205 x 285 x 12,5 mm, 235 x 328 x 12,5 mm, 265 x 370 x 12,5 mm

PRODUCT VARIANTS

Ident	Height	Surface	Colour
TS DNG 2028	12.5 mm	brushed	natural
TS DNG 2332	12.5 mm	brushed	natural
TS DNG 2637	12.5 mm	brushed	natural

Please note: For technical reasons, tolerances in color effects of the materials and print are possible.
