Emergency module Duo 5W Manual&Self-test for Kosnic Lowbays

- Select manual or self-test mode via the dual-mode DIP switch
- To adjust green LED indicator brightness, press and hold the test button for more than 3 seconds
- To set the duration test interval, press the push switch twice
- For maintained or non-maintained emergency lighting systems
- Automatic Self-test conforming to BS-EN-62034
- Designed for easy installation and battery replacement
- LiFePO4 battery with improved lifespan
- With patented adaptive current control, this emergency module is suitable for LED load with a forward voltage between 30 to 300V

Overview

The emergency module is an optional extra for a selection of Kosnic LED Low Bay luminaires.

This module will add a minimum 3hr duration emergency lighting option, giving you complete peace of mind in all your installations. Plus, with this module, you can switch between standard and self-test.
