

M11 Recessed Motion Sensor

MWS-REC/DV MWS-REC/DV

Recessed microwave Sensor, 1-10V dim output, remote required

- Suitable for basic on-off control or control of 1-10V dimmable luminaires
- Optional daylight harvesting
- Discrete flush mounting
- Optional stand-by dimming
- Minor motion sensitivity suitable for office and classroom applications
- Parameters settable by DIP switches or remote control
- Up to 800W inductive load capacity
- Push-fit terminals
- Pre-programmed scene selections
- New product code: MAL-M/DV

Overview

The M11 Recessed Motion Sensor provides both on/off and 1-10v control and can switch up to 1KW of resistive load. With settings for a test light, detection area, hold time, daylight sensing, stand-by period and standby dim level there is a setting for every need.
