

VEG300-GRY VEG300-GRY

Vega, solar powered flood light 300lm 110° Grey 6000K

- Provided with high output monocrystalline silicon solar panel
- Dusk to dawn & microwave sensor
- High efficiency upto 170lm/W
- Easy installation with no mains wiring required
- Solar panel and flood light can be installed up to 3m apart with option of extension cable

Overview

The Vega LED Floodlight uses an internal battery, recharged by the Monocrystalline silicon solar panel. With a built-in microwave sensor via a remote for setting. When detection mode is selected it will stay on at a dimmed level and raises to light level when motion is detected. Outdoor rated, simple to install with no external wiring.

Technical Summary

Product Code

VEG300-GRY

General Information

Materials	Housing aluminium alloy, Solar polysilicon
Installation Area	External
