## Overview

The Volga is a tough waterproof IP69K batten for harsh environments. Using high lumen SMD chips and a high transmittance PMMA cover to give a uniform output. Connections at both ends for linkage and clip-on bracket for easy installation. Suitable in farms, factories, warehouses and other areas with high humidity and dust.

## General Information

|                   |  |
|-------------------|--|
| Materials         | Housing 304 stainless steel, Diffuser PMMA |
| Installation Area | Internal and External                      |

# Volga
