Technical Data

Wall or Ceiling or Both (Dual)	Dual
Fire Rating	• 1 Hour Fire Rated
Fire Test Standard	• BS EN 1364-2: 2018 • BS EN 1634-1: 2014+A1:2018
Fire Performance Rating	• Integrity (E)
Fire Tested Side	• Wall application Face (Room Side / opening towards the fire risk side)

	• Ceiling application Face (Room Side / opening down towards the fire risk side)
Fire Tested Size H x W mm	600x600mm
Assessed Maximum Panel Sizes	No increase permitted
Size range: Minimum to maximum (H × W mm). Fire Rated Panels: See assessed maximum panel sizes for allowable increases.	150x150mm up to 600x600mm
Smoke Tested	No Rating
Airtightness Tested	No Rating
Acoustic Tested	No Rating
Wall Types	• Other rated wall constructions, not listed below, may also be acceptable, subject to expert advice from a qualified fire consultant • Plasterboard clad shaft walls, utilising 2No 12.5mm Type F boards (as defined within EN520) • Board clad shaft walls, utilising 2No layers of 10mm thick Glasroc F Multiboard • Wall types must be supported by fire test evidence confirming 60 minutes fire resistance E60 or EI60 to BS EN 13501-2.
Ceiling Types	• Other rated ceiling constructions, not listed below, may also be acceptable, subject to expert advice from a qualified fire consultant • Plasterboard clad non-loadbearing suspended ceilings, utilising 2No 12.5mm Type F boards (as defined within EN520). • Board clad non-loadbearing suspended ceilings, utilising 2No layers of 10mm thick Glasroc F Multiboard.
Frame Fixing Types	• Clamped in place with the FlipFix Clamps. The FlipFix device covers boards from 12.5mm to 32mm.
Permitted Gaps Between the Rear of the Frame and the Structural Opening	• 2.5mm Height x 2.5mm Width
Permitted Sealants	• Mann McGowan Pyromas A • Sealant that has been previously fire tested to BS 476: Part 20 or Part 22: 1987 or BS EN 1363-1: 1999 or BS EN 1634-1
Structural Opening Size	Panel Height Size + 5mm x Panel Width Size + 5mm
Panel Size Formula H x Wmm	Overall Back of Frame Size
Clear opening size through the installed panel with the door leaf open at 90 degrees	Panel Height - 50mm x Panel Width - 75mm
Composition / Manufacturing	
Quality Category	Mid Range
Ironmongery Details	• Standard budget lock manufactured from Bright zinc plated mild steel • Fast Fit Spring Pin Pivot Hinge manufactured from electroplated steel • Screw Pin Hinge, manufactured from Bright Zinc Plated (BZP) steel • Steel FlipFix fixing device, manufactured from Hot Galvanised Dipped Forged Steel
Lock Security Level	Grade 1 – Low Security
Frame Architrave Width (e.g. Picture / Beaded Frame)	• 25mm
Frame Steel Thickness	0.9mm
Door Steel Thickness	0.9mm
Frame Depth	60mm
Board Infill Type	• 12.5mm Thick GTEC Universal Board
Door Insulation Type	• None
Seal Type	• None
Paint Type	• Polyester Powder Coated

· RAL 9010 30% Gloss Pure white

1) To fit the panel, cut the plasterboard to the structural opening size required ensuring the aperture is 5mm larger than the panel size.

2) Apply Intumescent Sealant to the rear of the Beaded Frame on the frame jamb before installation.

3) Place the frame in the aperture, no need to remove the door from the frame.

4) Make sure you set your drill to a low torque setting before the next step.

5) Proceed to screw the FlipFix device in place until it grips on to the rear of the plasterboard securely.

6) If the door has been removed from the frame, refit the door by tightening up the hinge bolts back in position and closing the door.

7) Lock the door with the key, ensuring it is flush with the frame. Sit back and relax, you've just saved yourself 20 minutes.

Independent support may be needed for the Access Panels weight.

Before applying the plaster skim coat, apply joint filler and scrim tape over the junction between the beaded frame and the beaded door plasterboard to prevent cracking.
